

On the occasion of the first World Indoor Championships taking place in Poland, Dr. Leszek Albiniak has produced a series of books with some of the most fascinating statistics related to the World Indoor Championships. Among them, for example, readers may find the complete compilations of the World Indoor Championships performances by all the athletes ever competed in the championships, fascinating.

It is our hope that by the 2016 World Indoor Championships, Dr. Albiniak will add more events to the series of the books that currently include long jump and shot put.
